**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-55 and 64-99, drawn to a motor and motor control apparatus and method are classified in class 318, subclass 727.

II. Claims 56-63, drawn to a generator and generator control, classified in class 322, subclass 20.

The inventions are distinct, each from the other because of the following reasons: Inventions "motor control" and "generator control" are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the invention related to motor control has separate utility such as applications on electric vehicles, refrigerators, pumps, fans and other devices. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2837

A telephone call was made to Roberto Capriotti on June 26, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is also reminded to cancel all non-elected claims.
